

## PE Protect®

### Floor-protector

Protection against liquids such as grease / oil / wine / coffee

- ✓ **Unique formula**
- ✓ **Environmentally friendly**
- ✓ **Protects AND treats**
- ✓ **Ready for immediate use**

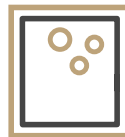

Effective, easy  
**and convenient to use**

1

Spread the product evenly in a thin layer of approx. 100gr/m<sup>2</sup> over the floor using the squeegee.

2

Please note: The floor must be damp for at least 10 minutes after application. If the floor dries within this time, immediately reapply the product according to step 1.

3

If the floor is still damp after 10 minutes, use the microfibre cloth or sponge to wipe product that hasn't dried over areas that absorb more quickly or appear drier.

4

Remove excess product with the microfibre cloth or sponge by rubbing down the surface treated evenly and wiping it dry without leaving any streaks.

5

If the floor is cleaned with a cleaning product, reapply PE Protect.
